

邢台硕顶商贸有限公司
Xingtai Shuoding Trading Co., Ltd.

公司简介
Company Profile

Company Introduction

Team

The company has 18 employees, including 9 experienced project managers, who are close to importers and exporters around the world.

Advantage

Significant achievements in lithium battery production line, roller press machine, slitting machine, rubber sealing strip, jute products, steel files, pet food and accessories.

Capital

Registered capital of RMB 20 million.

Mr Jerry Zhao (CEO)

Mobile/Whatsapp: +86-19803295498

Wechat: rory8866

E-mail/skype: sdtrading0927@126.com

Website: www.xtshuoding.com

Address: No. 119 Zhongxing East Street, Xiangdu District, Xingtai City, Hebei Province, China.

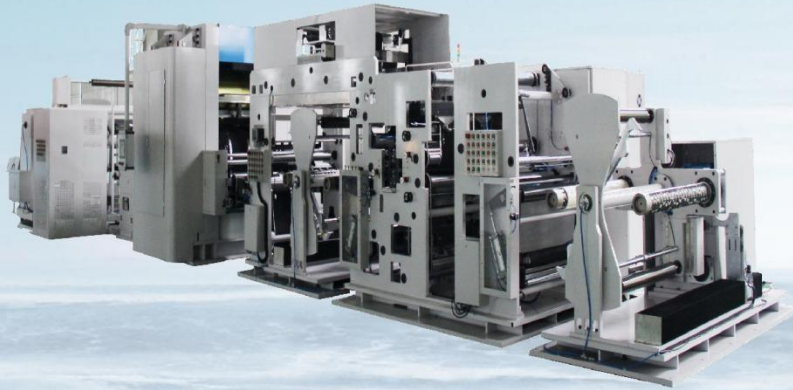

Payment Method: T T & L/C.

Lithium battery production line

★ Roller Press&Slitter

**Product Model: SD750-
W1100-ZQ Automatic Rolling
Slitter Machine**

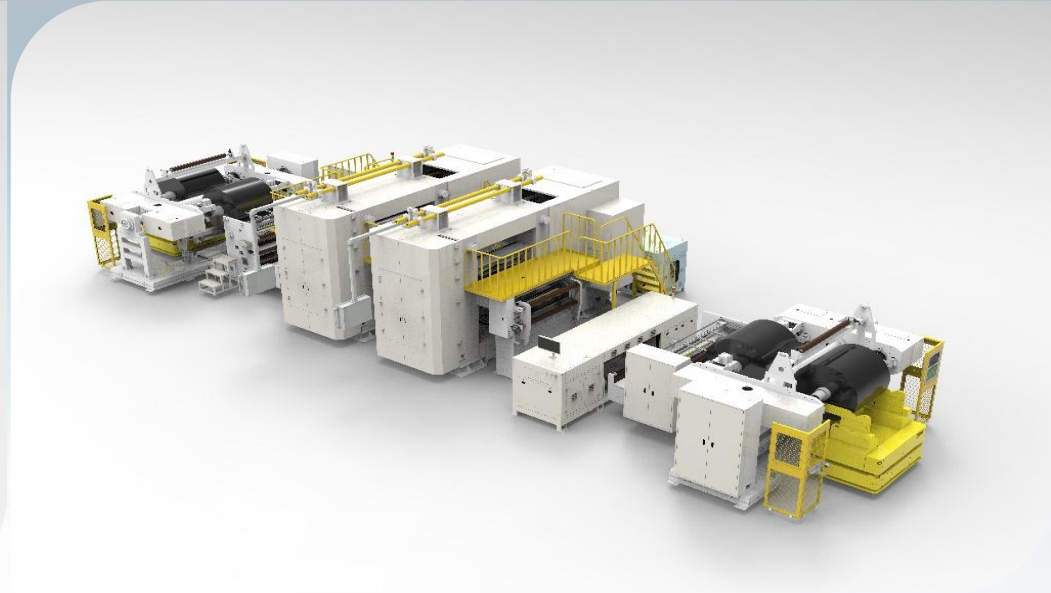

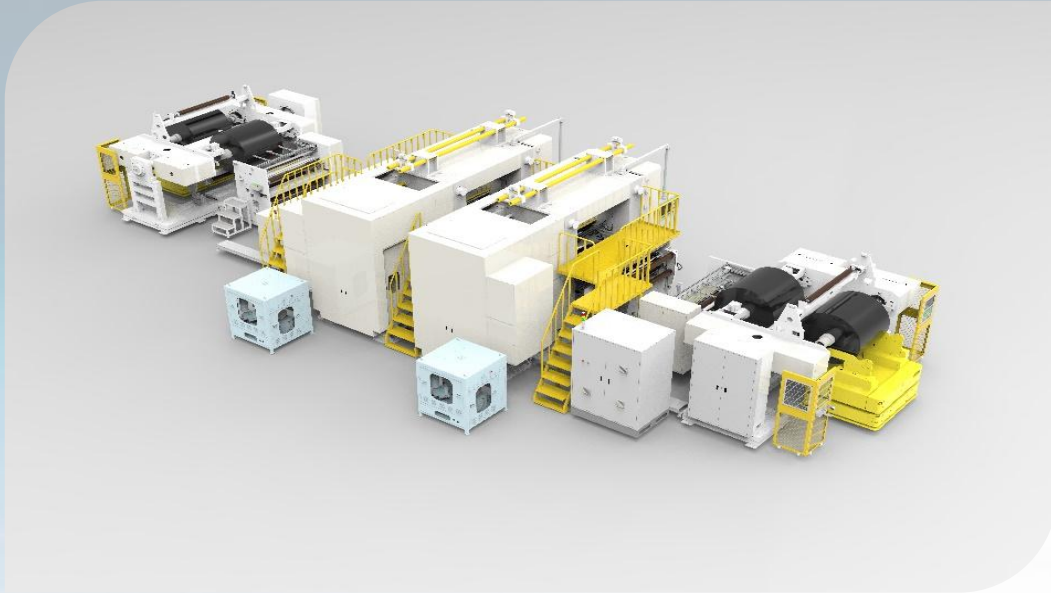

**Product Model: SD900-A950 Automatic
Battery Pole Continuous Rolling
Production Line**

**Product Model: SD750-
C600-S50 Lithium
Electric Slitter**

900*1500 negative electrode double machine continuous rolling automatic belt jointing machine

Product Introduction: This is an integrated equipment for battery negative electrode production, combining double-machine continuous rolling and automatic strip connection functions, suitable for the production and processing of wide-width negative electrode materials.

Technical features: double-machine continuous rolling design, automatic strip splicing function, high-precision roller pressing, configurable pressure closed-loop and roll gap closed-loop control, speed closed-loop and tension closed-loop control for unwinding, high-precision tensile tension control, special roller surface treatment (chrome plating or tungsten carbide).

900*1200 positive electrode roller pressing and slitting machine

Product Introduction: This is an integrated device for battery positive electrode production, combining rolling and slitting functions, suitable for the production and processing of medium-width positive electrode materials.

Technical features: integrated design of rolling and slitting, high-precision rolling, configurable pressure closed-loop and roll gap closed-loop control, speed closed-loop and tension closed-loop control for unwinding, high-precision tensile tension control, special roller surface treatment (chrome plating or tungsten carbide).

800*800 roller press machine

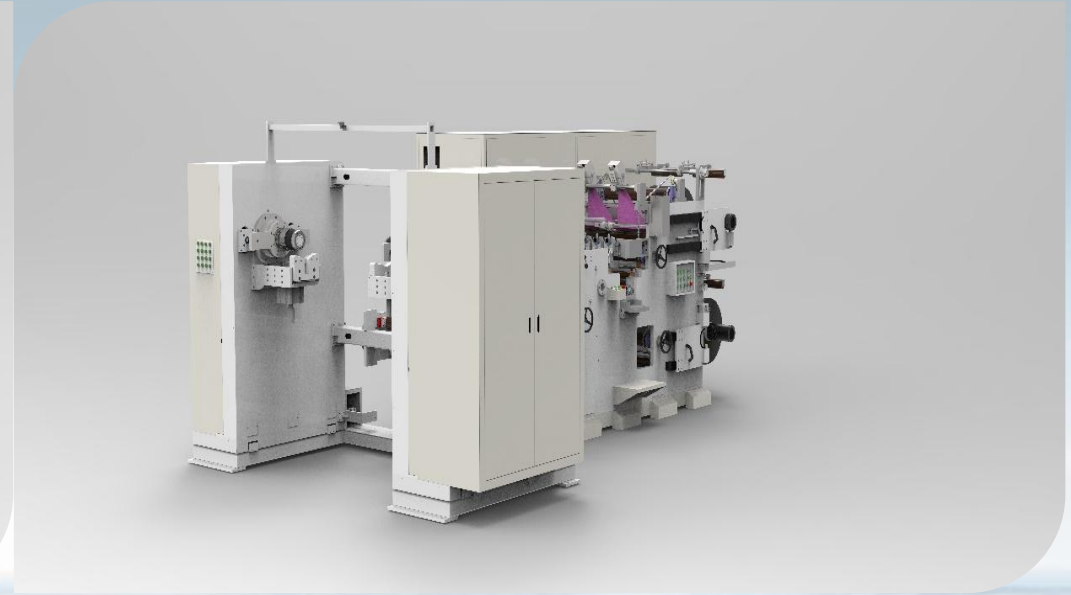

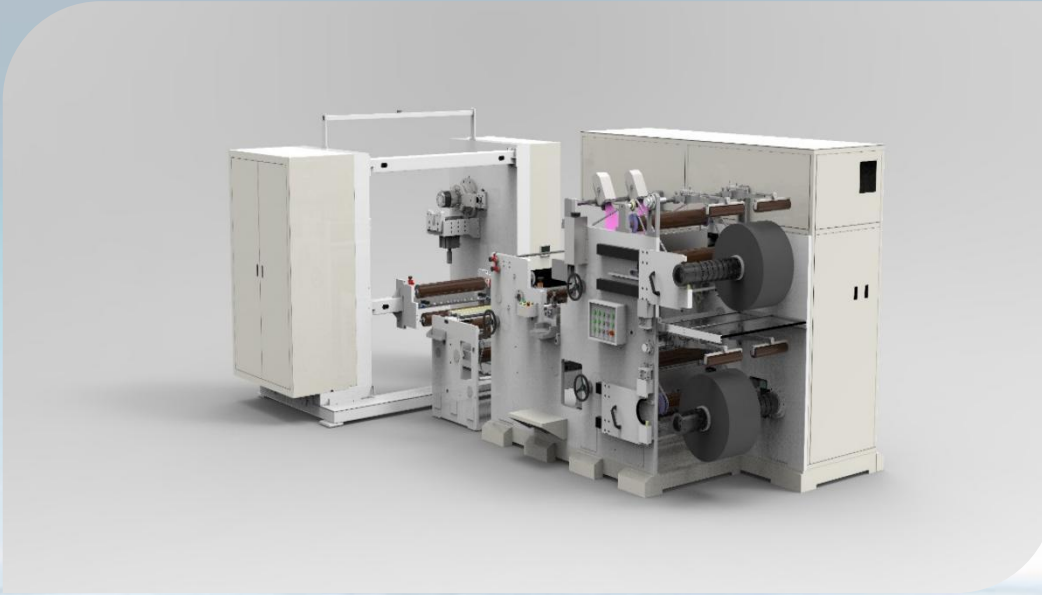

Product Introduction:

This is a roller pressing equipment used in the production of battery materials, suitable for compacting small and medium-width battery materials.

Technical features: high-precision roll pressing, configurable pressure closed-loop and roll gap closed-loop control, speed closed-loop and tension closed-loop control for unwinding, special roll surface treatment (chrome plating or tungsten carbide).

800*700 slitting machine (electronic knife/standard knife holder)

Product Introduction: This is a precision slitting equipment used in the production of battery materials, suitable for precise slitting of small and medium-width battery materials.

Technical features: high-precision slitting, configurable CCD width measurement and process correction closed-loop control, unwinding adopts speed closed-loop and tension closed-loop control, upper knife can be configured with a separate drive electronic knife, which is convenient for fast knife change and high collection degree.

Jute products

Jute sacks

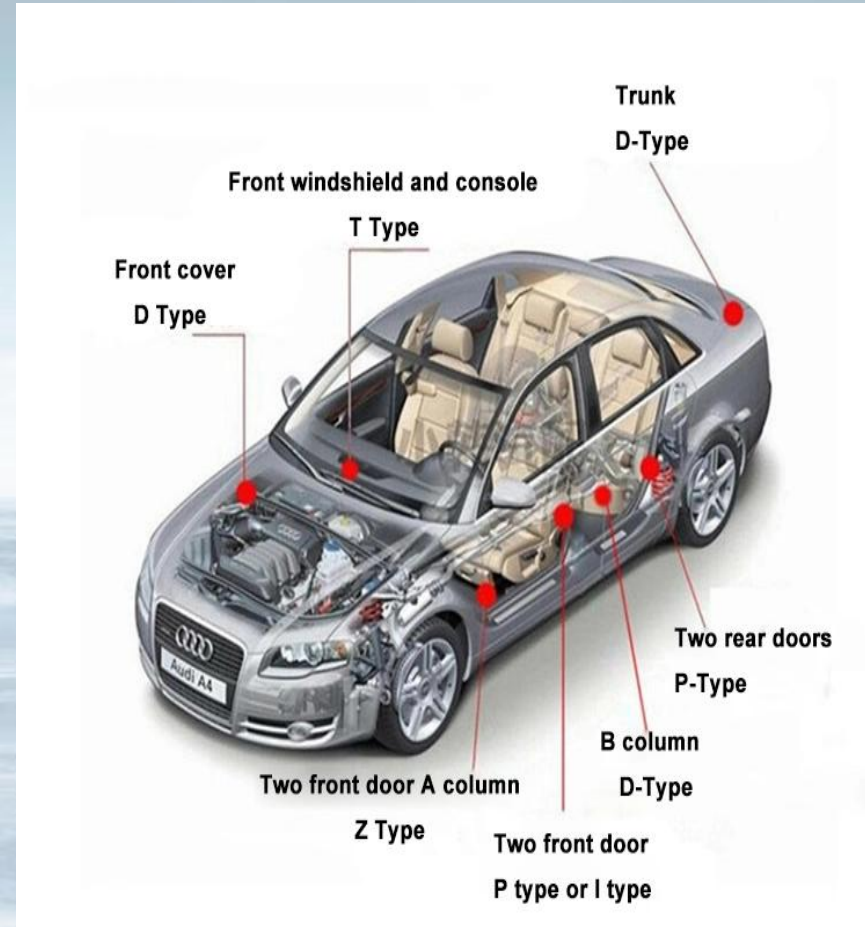

Jute fabrics

Jute ropes

Rubber sealing strips

Steel files

Pet products

Different Shape Of Pet Food

PRODUCTS RECOMMENDED MORE OPTIONS

Bentonite cat litter

Sodium cat litter

Tofu cat litter

Mixed cat litter

Millet cut cat litter

Millet crusher cat litter

Crystal cat litter

Pine cat litter

Deodorant beads

Roller Product Description

High carbon high speed steel roll

Semi-high speed cold rolling intermediate roll

New high roughness retention capacity cold rolling work rolls

Work rolls for high-grade, high-strength plate rolling

Cold rolling work rolls for high grade automotive sheets

High wear-resistant chrome-free work rolls

New high speed steel series rough finishing work rolls

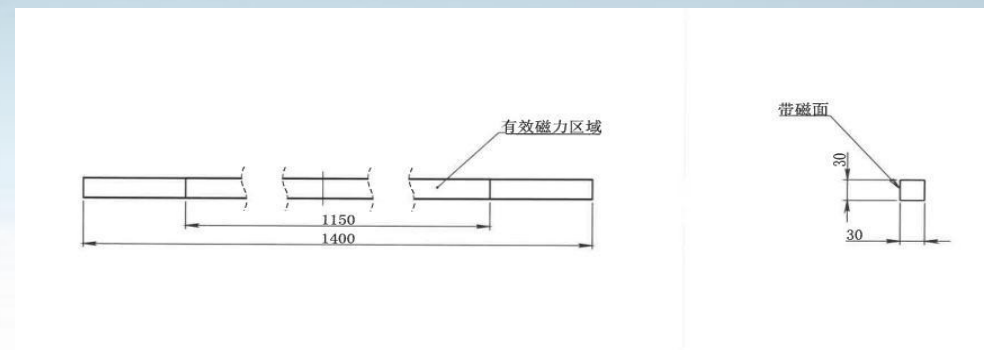

Practical impact resistant two-roller rough roll

Customized processing parts

Aluminum guide roller

Magnetic rod

Organ cover

Framework oil seal

Oil filter

Air cleaner

DISC

Car mat

Gear

Nylon sprocket

Ceramic bearing

Atomizing nozzle

A nighttime photograph of the Frankfurt skyline. The Main Tower (Main Tower) is the central focus, illuminated with warm yellow lights. To its left is a historic clock tower with a dark dome. To the right, other modern skyscrapers are visible, some with blue and white lights. The foreground shows a street with cars and some lower buildings. The sky is a deep blue with a hint of orange from the setting or rising sun.

THANK YOU
FOR WATCHING
